

Dear Ron Jarvis,
Cc: Craig Menear
Gerard Arpey
Jeffrey H. Boyd
Todd Nash

Attached is a petition signed by 21,622 consumers from across the U.S. On behalf of these supporters, we urge you to ensure that the wood sold at The Home Depot is harvested in a manner that protects the boreal and other climate-critical forests around the globe.

The Canadian boreal forest is the largest remaining primary forest on the planet. It stores 300 billion tons of carbon, provides habitat for threatened boreal caribou, billions of birds and a multitude of other species. The boreal is essential to the sustenance and culture of hundreds of Indigenous communities. Unfortunately, one and a half football fields' worth of the forest are cut down every minute to produce softwood lumber, wood pulp and other products. American companies like The Home Depot contribute to demand for these products

This petition calls on The Home Depot to use your purchasing power to protect the boreal forest, which is critically important for the climate, biological diversity and the communities that rely upon it.

Sincerely,

Sammy Herdman
Associate, Public Lands
